

# SCIENTISTS WHO BELIEVED THE BIBLE

**Sir Ambrose Fleming** (1849-1945) was an electrical engineer and physicist who has been called '*the pioneer of electronics*'. His most famous invention was the thermionic valve – used in radios, etc before transistors were invented. He also established *the right-hand rule*, still used in physics today. In 1885, he became the first professor of electrical engineering at University College, London. Then in 1892, he was elected a Fellow of the Royal Society (of scientists).

This highly decorated scientist (receiving a medal from the *Royal Society* in 1910; the Albert Medal from *The Royal Society of Arts* in 1921; the Faraday Medal by *the Institution of Electrical Engineers* in 1928; and was knighted in recognition of his scientific achievements 1929) was a strong, Bible believing Christian. In fact, he wrote these words on the matter: "*There is abundant evidence that the Bible, though written by men, is not the product of the human mind. By countless multitudes it has always been revered as a communication to us from the Creator of the Universe.*"
