

# SCIENTISTS WHO BELIEVED THE BIBLE

In 1962 a symposium on Antarctic research was named in honour of the oceanographer, **Matthew Maury (1806-1873)** by the American Geophysical Union. *“It is fitting,”* they said, *“that this Symposium, based on results obtained by scientists of many countries, working harmoniously and fruitfully in Antarctica...should be dedicated to Maury – a pioneer in cooperative international studies on the oceans, the atmosphere, and the polar regions.”* And no wonder! This pioneer in ocean studies had written papers which were all major publications in their day, as well as bringing ten sea-faring nations together to cooperate on the subject in 1852! And this legend of science was a great Bible believer too...

*“I have been blamed by men of science,”* he said, *“...for quoting the Bible in confirmation of the doctrines of physical geography. The Bible, they say, was not written for scientific purposes, and is therefore of no authority in matters of science. I beg pardon! The Bible is authority for everything it touches...”* Yes, he was another great scientist who believed the Bible. So, don't let anyone tell you science rules out God!
